

PRODUCT & MARKET DECK · SEPTEMBER 2026

The AI video agent *for customer success.*

A face, a voice, and the context to move every
website visit forward.

Built for sales, support, and measurable outcomes.

ruhanaai.com

Problem

Customers do not want another barrier between intent and help.

THE STRUCTURAL FAILURE

Old bots know a script—not the page, the visitor’s intent, or the outcome the business needs.

They report conversations and minutes while revenue, resolution, and customer effort remain invisible.

Solution

A high-IQ video agent inside the exact moment a visitor is deciding.

Ruhana does not wait for the visitor to explain the page.
It arrives with context.

The agent sees what the visitor is viewing and doing, holds a natural face-to-face conversation, takes the next best action, and records the business result.

01

See

Page, product, click and journey context

02

Understand

Question, intent, readiness and risk

03

Act

Qualify, recommend, book, capture or hand off

04

Prove

Revenue, resolution and outcome analytics

Why Now

Four technology curves and one buyer shift are converging.

01 **Expressive in real time**

Video and voice models now sustain live, interruptible, emotionally legible conversation.

02 **Intelligence is affordable**

Language models can reason over products, policies and objections within SaaS unit economics.

03 **The browser is observable**

First-party page, click and journey signals can shape the conversation while it happens.

04 **Customers expect action**

58% of GenAI users have used it to complete a task; the figure reaches 74% in B2B.

05 **The category is opening**

Avatar-based online customer service is forecast to grow at 31.2% CAGR through 2033.

THE THRESHOLD

From interface to presence

Market Size

A focused wedge inside a fast-expanding conversational interface market.

Land in the decision.
Expand across the journey.

Ruhana starts with sales and support conversations on high-intent website pages, then expands into onboarding, retention, service navigation, and enterprise knowledge work.

31.2%	Avatar customer service CAGR
\$267.9M	Category revenue in 2025
\$2.37B	Category forecast for 2033

Target Market

Start where the visitor's intent is visible and the result can be measured.

Competitive Landscape

The category is strong at embodiment or orchestration. Ruhana joins both around outcomes.

RUHANA'S WEDGE

A customer-success system with a face—not a face waiting for a system.

- 01 Live page + journey context
- 02 Goal-directed sales and support actions
- 03 Revenue, resolution and intent analytics
- 04 Four-step no-code deployment
- 05 Private enterprise pathway

Product

A closed loop from observable intent to measurable customer outcome.

The product already connects the loop.

Four-step agent builder · embeddable website widget · live transcripts · action capture · business-impact analytics

- **Page context** Current page, visible section, last click
- **Journey memory** Views, time, scroll depth, interactions
- **Outcome layer** Lead, booking, purchase, resolution, handoff

Why Ruhana Will Win

The moat is the customer journey around the avatar—not the avatar alone.

Timeline & Traction

Built first. Validate outcomes next. Scale only after the loop is proven.
